### Individual Insurance Market Protections

**Pre-existing conditions protections:** Oregon has a guaranteed issue law, requires the use of adjusted community rating, and prohibits pre-existing conditions exclusions.

**Short-term, limited-duration and association health plans:** Oregon limits the initial contract duration of short-term, limited-duration health plans to three months, and underwritten short-term, limited-duration coverage cannot exceed three months in a five month period. Oregon requires that an association form for a purpose other than offering insurance and be in existence for a minimum of two years before offering coverage. Coverage sold to individuals and small businesses through a fully-insured association must comply with individual and small-group market standards respectively. Self-funded association health plans must satisfy the same licensure and financial standards as commercial insurers.

**Reinsurance:** Oregon has obtained a section 1332 waiver to establish a reinsurance program. Oregon's reinsurance program has an attachment point of \$90,000 and will cover costs up to \$1,000,000 at a rate of 50%.

\*Although stated eligibility level for parents of dependent children would not warrant an "A," state has expanded Medicaid to enable individuals previously ineligible for Medicaid to become Medicaid eligible up to 138% eligibility FPL and, therefore, earns an "A."
